Lower Risk

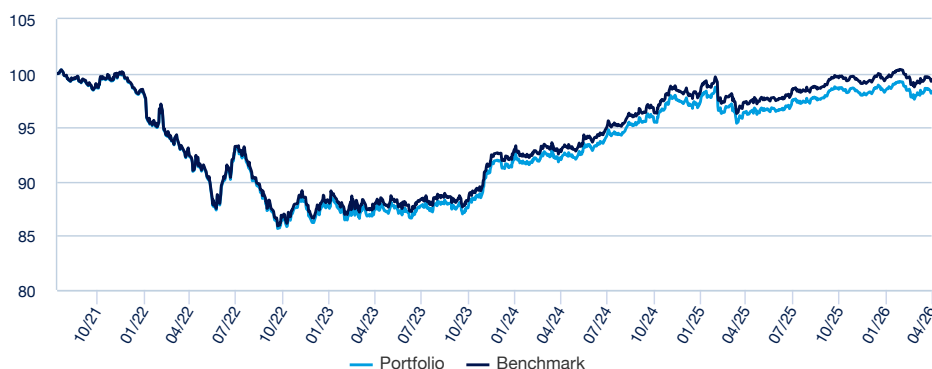

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 3 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

“ Technical net asset values may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a business day nor a transaction day. These technical net asset values are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares.”

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

BOND

Description of the Index

The benchmark index is representative of the performance of investment grade rated Green Bonds issued by corporates and denominated in EUR and USD. To be eligible for inclusion in the Index, a bond must be considered a "Green Bond" by the Climate Bonds Initiative and meet specific criteria pertaining, in particular, to its issue size (at least 300 million outstanding amount), maturity (at least one year until maturity), ratings (only investment grade bonds are eligible) and denomination currency (EUR and USD). An ESG screen is also applied to the index to exclude issuers based on exposure to controversial businesses and those which are subject to UN Sanctions and/or "Non-Compliant" with regard to the Overall Global Compact Compliance.
