What is this product?

Type: Shares of a Sub-Fund of MULTI UNITS LUXEMBOURG, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Sub-Fund is passively managed.

The objective of this Sub-Fund is to track the performance of STOXX Europe 600 Energy Screened+ Index (the "Index"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index.

The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus.

The Index is a Net Total Return Index: dividends net of tax paid by the Index constituents are included in the Index return.

The Index is a market cap weighted index designed to represent the performance of securities from the STOXX Europe 600 Index (the "Initial Universe") that belong to the energy industry as defined by the Industry Classification Benchmark ("ICB"), after applying a set of compliance, involvement and ESG performance screens, as further described in Appendix I – ESG

The Sub-Fund promotes environmental and/or social characteristics through among others, replicating an Index "integrating an environmental, social and governance ("ESG") negative screening approach.

The negative screening approach consists in excluding at least 20% of companies from the parent index (expressed in number of constituents) based on:

- Controversial business activities

- ESG controversies

- An ESG rating if less than 20% of the parent index has been excluded based on controversial business activities and ESG controversies.

Related Disclosures to the Sub-Fund's prospectus. The Initial Universe provides exposure to the performance of the 600 most liquid large, mid and small caps stocks covering developed markets in Europe.

The limits of the approach adopted are described in the Sub-Fund's prospectus through risk factors such as ESG risk. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete.

Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed.

More information about the composition of the Index and its operating rules are available in the prospectus of the Sub-Fund and at the Index provider's website: www.qontigo.com.

The Index value is available via Bloomberg (SXREESGP).

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the index. The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management.

The limits of the approach adopted are described in the Sub-Fund's prospectus through risk factors such as Risk linked to ESG Methodologies. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete.

Updated composition of the Sub-Fund holdings is available on www.amundietf.com.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the MULTI UNITS LUXEMBOURG prospectus.

Distribution policy: As this is a non-distributing share class, investment income is reinvested. the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.
