What is this product?

Type: Shares of a Sub-Fund of Amundi Index Solutions, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: This Sub-Fund matures on 31/12/2027. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: This Sub-Fund is passively managed.

The objective of this Sub-Fund is to track the performance of FTSE German Government 2027 Maturity Index (the "**Index**"), and to minimize the tracking error between the net asset value of the Sub-Fund and the performance of the Index.

The anticipated level of tracking error under normal market conditions is indicated in the Sub-Fund's prospectus.

The Index is a Total Return Index: the coupons paid by the Index constituents are included in the index return.

FTSE German Government 2027 Maturity Index is a bond index representative of fixed rate, euro-denominated government bonds issued by Eurozone member country Germany and maturing in 2027. The bonds comprised within the Index will gradually mature through the year 2027 and interest and principal payments received from matured bonds during the month will be reinvested in government securities issued by France or Germany (Treasury bills) with 1 to 6 months remaining time to maturity as of each monthly rebalancing date. It is important for investors to take this into consideration before making any investment in the Sub-Fund in the final year and in the period approaching the final year.

The Sub-Fund has a fixed maturity on 31 December 2027. On the maturity date, upon decision of the Board of Directors, the shareholders of shares in the sub-fund may have their shares redeemed without further notice or shareholder approval.

The Sub-Fund does not seek to return any predetermined amount at maturity or in periodic distributions.

More information about the composition of the Index and its operating rules are available in the prospectus and at: www.ftse.com

The Index value is available via Bloomberg (CFIIDE27).

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents. The sub-fund may implement a sampled replication model in order to track the performance of the Index and it is therefore not expected that the sub-fund will hold each and every underlying component of the Index at all times or hold them in the same proportion as their weightings in the Index. The sub-fund may also hold some securities which are not underlying components of the Index.

The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and also if it allows a better exposition to an Index constituent. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the Amundi Index Solutions prospectus.

Distribution policy: The Fund's amounts available for distribution (if any) will be distributed.
