## What is this product?

**Type:** Shares of a Sub-Fund of MULTI UNITS LUXEMBOURG, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

**Term:** The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

**Objectives:** The Fund is an index-tracking UCITS passively managed.

The investment objective of the Fund is to track both the upward and the downward evolution of the Solactive Green Bond EUR USD IG Index (the "Benchmark Index") denominated in EUR, in order to offer an exposure to the Green Bonds market, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

The Benchmark Index is representative of the performance of Green Bonds issued by investment grade entities and labelled in Euros and US Dollars. Green bonds are issued in order to fund projects that have positive environmental outcomes. To be eligible in the Benchmark Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative, through a four-step process that includes: identification of environmentally themed bonds, reviewing eligible bond structures, evaluating the use of proceeds and screening eligible green projects or assets for adherence with the Climate Bonds Taxonomy. More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>. The Index follows an extrafinancial approach significantly engaging that contributes to the energy and ecological transition by investing at least 90% of the net asset value of the Fund in Green Bonds comprising the Index. Limits of the methodology of the Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete.

Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed.

Solactive's website (<https://www.solactive.com/>) contains more detailed information about the Solactive indexes.

The Benchmark Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Benchmark Index. To optimize the Benchmark Index replication, the Fund may use a sampling replication strategy, and may also engaged in securities lending transactions. The potential use of these techniques is published on Amundi's website: [www.amundiETF.com](http://www.amundiETF.com).

Updated composition of the Fund holdings is available on [www.amundiETF.com](http://www.amundiETF.com).

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

In order to hedge the currency of the share against the currency of the index, the Fund uses a hedging strategy which reduces the impact of changes between the currency of the Index and the currency of the share class.

**Intended Retail Investor:** This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment and to receive income over the recommended holding period with the ability to bear losses up to the amount invested.

### What happens if Amundi Luxembourg S.A. is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of MULTI UNITS LUXEMBOURG. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10,000 invested.
