## Objective and Investment Policy

The Amundi Multi-Asset Portfolio Offensive UCITS ETF Dist fund-of-funds combines the advantages of competitively priced, passively managed ETFs with the broad diversification of fund-of-funds. The fund invests in three asset classes: equity, fixed income and commodities. The aim of this multi-asset strategy is to achieve a long-term growth by a broad diversification of asset classes, geographic regions, sectors and currencies. As the Lyxor Portfolio Strategy Offensive UCITS ETF invests in a number of ETFs which are already diversified, the fund-of-funds achieves an even higher diversification of its investment. Following a performance-oriented approach, the equity exposure amounts to 80% and includes both developed and emerging markets. Within the equity exposure the focus is on both technology companies and small-medium sized enterprises. 10% of the portfolio is invested into corporate high yield bonds which are denominated in Euro. The commodity exposure stands at 10% and is represented by a basket of 12 commodity futures. The weight of 80%/10%/10% is rebalanced once a year to its original allocation. Moreover, an extraordinary rebalancing takes place if the equity quota deviates from the initial asset allocation by more than five percentage points.

Amundi ETFs are efficient investment vehicles listed on exchange that offer transparent, liquid and low-cost exposure to the underlying benchmarkindex.

Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.
