Objective and Investment Policy

The investment objective of the Sub-Fund is to track both the upward and the downward evolution of the MSCI Europe Climate Action Net Total Return Index (the "Index"), denominated in Euros, while minimizing the volatility of the difference between the return of the Sub-Fund and the return of the Index (the "Tracking Error").

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

« Technical net asset values may be calculated and published for any calendar day (excluding Saturdays and Sundays) that is neither a business day nor a transaction day. These technical net asset values are merely indicative and will not be the basis for purchasing, switching, redeeming and/or transferring shares. »

Ex-post Tracking Error	0.07%	0.07%	0.07%
Sharpe ratio	0.85	0.61	0.61

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Index Data (Source : Amundi)

Description of the Index

The Index is based on the MSCI Europe Index (the "Parent Index") and is representative of the performance of large and mid-cap stocks, across developed European countries, issued by companies that have been assessed to lead their sector peers in terms of their positioning and actions relative to climate transition, based on, among others, the MSCI "Climate Risk Management Weighted Average Score", while minimizing the volatility of the difference between the return of the Index and the return of the Parent Index.

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Evaluation by ESG criteria (Source: Amundi)

	Benchmark	Parent index
Overall Rating	8.33	7.97
Environment	7.15	6.71
Social	5.54	5.36
Governance	6.70	6.70

Parent index : **MSCI EUROPE**

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

"E" for Environment (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

"S" for Social (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

"G" for Governance (Corporate Governance and Corporate Behavior)

Carbon footprint**Carbon footprint: carbon emissions per euro million invested**

	Benchmark	Parent Index
Total carbon portfolio footprint (Index/Parent index) :	65.54	88.86

Carbon footprint

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO₂e) per euro million invested.

This is an indicator of the emissions generated by investment in this portfolio.

Definition of scopes :

- **Scope 1** : all emissions that arise directly from sources that are owned or controlled by the company.

- **Scope 2** : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- **Scope 3** : All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3 - Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO₂e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO₂ equivalent.
