Objective and Investment Policy

The Sub-fund is a passively managed index-tracking UCITS. The Sub-fund replicates the TecDAX® (until 15 March 2020 price index with ISIN DE0007203283, from 16 March 2020 performance index with ISIN DE0007203275) (the "Index" of this Sub-fund) as a benchmark and pursues the investment objective of providing investors with a return that tracks the performance of the TecDAX®. The TecDAX® calculated by STOXX Ltd. (performance index) includes 30 companies that do not comply with the minimum quality requirements regarding their market capitalisation. The TecDAX® contains only companies that hold the "Tech" industry qualification in accordance with the "Guide to the DAX Equity Indices". Before joining the TecDAX®, companies must publish audited annual reports and quarterly reports. The companies must comply with certain provisions of the German Corporate Governance Code regarding audit committees. Only companies listed on the regulated market of the Frankfurt Stock Exchange, which are continuously traded in Xetra and have at least 30 trading days since initial listing and a minimum free float of 10% are eligible for inclusion in the TecDAX®. In addition, the companies must have their legal headquarters or operational headquarters in Germany. Foreign companies must have their legal headquarters in an EU member state or a state of the European Free Trade Area (EFTA) or an operational headquarters in Germany. The Sub-fund index is calculated as a performance index. The index composition is reviewed quarterly (March, June, September and December) on the basis of the fast-exit and fast-entry rules and semi-annually (March and September) on the basis of the regular-exit and regular-entry rules. Reweighting operations have an impact on the costs to be paid by the Sub-fund and thus on the performance of the Sub-fund. A tracking error of up to 1.25% can be expected when linking to the performance of the Index. Information about the index is available online at www.dax-indices.com. In compliance with the investment policy and investment limits described in the investment conditions and prospectus, the Sub-fund shall endeavour to achieve the investment objective by acquiring all (or, exceptionally, a significant number of) parts of the Index in the same proportion as the Index (as determined by the investment manager). Fully replicating ETFs may not hold every part or the exact weighting of a part in the benchmark. Instead, they may seek exposure to a benchmark through the use of optimisation techniques (so-called sampling) and/or investments in securities that are not part of a benchmark. Securities loan transactions and repurchase agreements may not be concluded. The Sub-fund may invest a maximum of 10% of its assets in shares of other domestic or foreign UCITS or CIUs. The use of derivative financial instruments is possible only in special situations in the interest of investors. The value of derivative financial instruments may not exceed 10% of the Sub-fund. At least 94 percent of the value of the UCITS special fund is invested in equity investments as defined by § 2 (8) Investment Tax Act.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility *	19.85%	18.32%	19.69%
Benchmark volatility	19.88%	18.35%	19.71%
Ex-post Tracking Error	0.10%	0.10%	0.09%
Sharpe ratio	0.40	0.34	0.37

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

EQUITY

Risk Indicator (Source : Fund Admin)

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. The risk of potential losses from future performance is therefore classified as medium. In very unfavourable market conditions, it is possible that the ability to execute your redemption requests will be compromised. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Further information can be found in the prospectus or the investor information document of Amundi DE.

Index Data (Source : Amundi)

Description of the Index

The TecDax® Total Return Index, which is calculated by Deutsche Börse AG, comprises the 30 largest companies from the technology sector that rank directly below the stocks included in the DAX® Index in terms of order book volume and market capitalization. Monitoring and rebalancing of the index composition takes place on a semi-annual basis, usually in March and September. The TecDax® Total Return Index was first calculated on March 24th in 2003 based on 1000 points on December 30th 1997.
