Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The investment objective is to replicate, both upwards and downwards, the performance of the S&P 500 Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in US dollars (USD) and representative of the performance of 500 large-cap stocks traded in the United States, while minimising the tracking error between the performance of the FCP and that of its Benchmark (the "Tracking Error"). The expected Tracking Error under normal market conditions is indicated in the Fund's prospectus. The S&P website (www.spindices.com) contains more detailed information on the Benchmark. The Fund aims to achieve its objective through indirect replication, namely by entering into one or more OTC swaps (eligible forward financial instruments, "FFIs"). The Fund may invest in a diversified portfolio of international equities, the performance of which will be exchanged against that of the Benchmark through the FFIs. The updated composition of the portfolio of securities held by the Fund is stated on the website amundiief.com. In addition, the indicative net asset value is shown on the Reuters and Bloomberg pages of the Fund and can also be stated on the websites of the Fund's listing markets. The Fund is eligible for the French Equity Savings Plan (PEA) and therefore invests a minimum of 75% of its assets in shares of companies in the European Union.

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the Amundi PEA S&P 500 UCITS ETF prospectus.
